

KOEDOE

African Protected Area Conservation and Science

The official research journal of South African National Parks [SANParks]
Now published by [OpenJournals Publishing](#), a proud division of AOSIS (Pty) Ltd

Editor: Dr Llewellyn Foxcroft, South African National Parks

About the journal:

KOEDOE, the research journal for South African National Parks (SANParks), has been published annually by the (then) National Parks Board since 1958.

KOEDOE aims to provide information and insight into the areas of conservation and science within protected areas across Africa. The journal publishes papers on a wide range of themes and from a wide range of ecosystems, with a focus on protected areas of all kinds.

Coverage:

The journal's first objective is the publication of original papers concerned with the science and management of protected areas across Africa. It is also concerned with the complex socio-ecological interactions which envelop, and are a cornerstone issue of protected areas in the African context, especially as humans and conservation areas interact in many ways. Further, understanding, documenting and mitigating the negative influences of human development on conservation areas is an important, growing issue.

KOEDOE is published by [OpenJournals Publishing](#), South Africa's first online, open access, author-pays publisher. [OpenJournals Publishing](#) is committed to disseminating high quality research in South Africa and worldwide.

KOEDOE provides immediate open access to its content on the principle that making research freely available to the public supports a greater global exchange of knowledge.

To access journal content, please visit the journal's webpage at www.koedoe.co.za

Journal Frequency:

KOEDOE publishes a print-on-demand hard copy of the journal at the end of each volume, but manuscripts are added to the online version of the journal on a rolling basis, i.e. as soon as they are ready for publication. This ensures the reader can access the very latest conservation research without delay.

Key journal audiences:

Research published in **KOEDOE** is applied to the development of concepts pertaining to conservation science and management, and is of pertinence to universities, research institutes and reference libraries. The application of **KOEDOE**'s content is of relevance to all whose concern is the management and wise use of protected areas.

Sample articles:

The potential distributions, and estimated spatial requirements and population sizes, of the medium to large-sized mammals in the planning domain of the Greater Addo Elephant National Park project
Boshoff, A.F., G.I.H. Kerley, R.M. Cowling and S.L. Wilson, University of Port Elizabeth

Habitat, food, and small mammal community structure in Namaqualand
M Van Deventer and J A J Nel, University of Stellenbosch

Activity patterns of African buffalo *Syncerus caffer* in the Lower Sabie Region, Kruger National Park, South Africa
S J Ryan, University of California at Berkeley and W Jordaan, SANParks

Author fees:

KOEDOE is sponsored by South African National Parks. As a result, papers submitted to the journal carry no author fees

About the Editor:

Dr Llewellyn Foxcroft

Llewellyn was appointed as Editor of **KOEDOE** in 2007. He has a PhD in plant invasion ecology from the University of Cape Town, and has been working for South African National Parks for over 10 years. His main interests are in the field of alien species invasions where he has published a number of papers examining the process and patterns of invasion in savanna ecosystems. Further, he has a broad interest in conservation biology and ecosystem ecology.

Submit an article to the journal:

To submit your article to **KOEDOE**, please visit www.koedoe.co.za and click on the "Online Submissions" link on the "About" page. Please consult the journal's Author Guidelines on the same page before submitting.
