

## Emerging tuskers project annual competition

Help the 'big tusker' legend live on in Kruger National Park

Send us your photos, digital images or videos

Win fantastic prizes

Scientists in the Kruger National Park are studying these impressive animals to identify all of the Park's large tuskers and clearly define their home ranges. Information is compiled from annual aerial censuses, and specific collaring and tracking projects. This work helps to improve our understanding of these animals and ensures future visitors will be able to appreciate them.

You can help us by providing photographs and information about any tusker you see within Kruger National Park and neighbouring private reserves. Any elephant with remarkable tusks (more than 1m long) is of interest. Full face images showing both tusks and ears are most useful. Close-up shots of any characteristic features will also be appreciated. Detailed information about the location and date of the sighting is crucial.

### How to submit your images

Please complete the form overleaf and send to the address below. Alternatively, send us an email with all the same information included.

### Rules and requirements

1. The competition is free and open to all members of the public.
2. We can accept prints, slides, digital images or digital videos. Please label each entry clearly. Do not write directly on the back of prints or staple them together. Please send duplicates, as no material will be returned.
3. All information and photographs will be retained for research and education purposes. By entering the competition you agree to allow SANParks to use your material in printed and electronic form, for non-commercial purposes (photographers will be acknowledged).
4. All entries must be received by 31<sup>st</sup> December. Any material received after this date will automatically be submitted into the following year's competition.
5. Prize winners will be announced by 1<sup>st</sup> March the following year.
6. The same material may not be submitted to the competition more than once.
7. The winners will be chosen based on the scientific value of the photographs and information provided, and on the quality of the images.
8. The judges' decision is final and no correspondence will be entered into.
9. All prizes are subject to availability of accommodation and may therefore be offered out-of-season.
10. We reserve the right to change any of these rules or prizes at any time if deemed necessary.
