Furthermore, SANParks oversees the management of the parks and provide strategic guidance and support from its Head Office in Pretoria.

BUSINESS UNIT RESPONSIBLE FOR THE BID

There has been an increase in demand for conservation support in the National Parks due to an upsurge in poaching, as well as more intensive management interventions required through the development of smaller parks. SANParks therefore require aircraft support for wildlife removals to stock other national parks to comply with contractual agreements, to generate income for the Park Development Fund through wildlife sales, and for SANParks' contribution to the Wildlife Economy. In addition, the management of certain species in smaller parks (e.g. carnivores and elephants) requires specialized management interventions such as contraception and translocations, and increased anti-poaching activities often require aerial support. Finally, regular wildlife surveys are necessary to determine the effects of all of these interventions, as well as to provide robust information for decision-making for subsequent years.

The rise in poaching of rhino in Kruger National Park has limited the availability of the SANParks helicopters for the above-mentioned operations, even within the Kruger NP itself.

An inability to provide such aerial support timeously poses serious risks to SANParks' ability to undertake the required interventions on schedule, with associated implications for the ecological processes and species being managed.
