Subject: RE: Die Stroom planned swimming pool

Good day

We can in principle supply the quantity from our system/reservoirs.

What is unclear though is how you plan to fill the water.

If you can do so through your existing supply pipelines then it all fine, if that is however not the case then you will need to make arrangements to transport the water as the municipality doesn't provide that service.

Regards/Groete

Good Afternoon

May you please assist. We are planning to build a swimming pool at Die Stroom. As per the plans, we need to know if the municipality can accommodate the swimming pool's 350 cubic metres of water when we fill it initially??

Kind regards,

Bulelwa Msengi

Dear Mr. Groenewald

Not sure if you are aware of a planned swimming pool to be constructed at Die Stroom section of the park. I've been contacted by our technical department to follow up with municipality wrt question that was asked regarding size of the pool and amount of water to used. Not too sure who from your team wanted the information hence I'm writing to you then you can better direct me.

As per the plans, we need to know if the municipality can accommodate the swimming pool's 350 cubic metres of water when we fill it initially??

Regards,

BULELWA MENGI
